

Cinte Techtextil China is the ideal trade fair for technical textile and nonwoven products in Asia. This year the fair welcomes **Fixatti (China) Polymer Specialties Co Ltd** from **China** to showcase their **thermoplastic polymer adhesives**.
(Detailed product info featured on page 2.)

Fixatti (China) Polymer Specialties Co Ltd

FIXATTI stands for the merger of Schaetti Coating Technology and Dakota Coatings, both considered global leaders in the adhesive powder and coating industry, who joined forces in November 2018. Both companies have an extensive production capacity in grinding, compounding and blending of a variety of polymers.

FIXATTI represents innovation, quality and application competence. They leverage on a long-lasting experience in this niche industry, with a dedicated international team, continuous major investments in R&D and modern manufacturing facilities. The advantages of scale throughout the entire organization from R&D to purchases, production and sales enables the new company to be and remain the most competitive solution provider in this specialty polymer market.

FIXATTI targets to expand its product ranges to further supply the automotive, building, textile, furniture, footwear and metal coating industries.

Years of experience and expertise to bring the right solution to a vast area of applications

Innovation is one of Fixatti's most important assets to keep us ahead of the curve in responding to industry trends, continuously invest in new technologies and know-how leading to a higher flexibility.

Fixatti focuses more and more on custom made products, developed for every specific application. Their specialty products meet the demanding requirements of a diversity of markets.

Markets served

Fixatti supplies a variety of thermoplastic & thermosetting adhesives into diverse markets such as the automotive, building and textile industries.

These adhesives are mainly applied through scatter coating devices. Our expertise in polymer powders, including but not limited to producing powders with the required particle size distribution, flow, properties and other modifications will help us to customize our products to fit your exact requirements.
