

**Cinte Techtexil China** is the ideal trade fair for technical textile and nonwoven products in Asia. This year the fair welcomes **Barnet Trading (Shanghai) Co Ltd** from **China** to showcase their products:

**Staple fiber:** polyester, nylon 6, 66, viscose, polypropylene fiber, etc.

**Short-cut fiber:** polyester, viscose, etc.

**Filament:** aramid filament, polyester industrial filament, antistatic filament, PE filament, etc.

**Specialty fibers:** acrylic, opan, meta-aramid, carbon shortcut, PBO, etc.

*(Detailed product info featured on page 2.)*

## Barnet Trading (Shanghai) Co Ltd

Barnet is a global manufacturing, recycling, and trading company, specializing in a wide range of fibers, polymers and yarns. Within each market, our range of products extends from industrial grade to specialty/high-tech. Barnet produces and supplies in many different resins to include Polyester, Nylon 6, Nylon 66, Acrylic, Polypropylene and Viscose.

Today, supported by sales and/or manufacturing facilities in the United States, Germany, Belgium, The Netherlands, Slovakia, China, Hong Kong, India and Costa Rica, and employing more than 400 associates, Barnet truly serves a world market of fibers, polymers and yarns.

## Staple Fibres & Short Cut

Barnet is one of the largest global traders and a producer of synthetic fibers in both staple and continuous tow, as well as short cut fibers to serve many new and technical applications.

The product range includes first grade fibers for hi-tech applications and environmentally friendly fibers produced from post-industrial and post-consumer waste materials. Also available are short cut fibers and specialty fibers such as hollow, flame-retardant, antibacterial and antistatic grades.

## Yarns - Industrial and Textile

Barnet is a global supplier of high tenacity filament yarns for all types of industrial applications such as narrow & board fabrics, cordage & netting, slings, hoses, reinforcements, mechanical rubber goods (MRG), geotextiles & industrial sewing threads; as well as synthetic filament yarns for all types of textile and semi-technical applications such as narrow & broad woven fabrics, circular & warp knit fabrics.

## Polymers - Fiber, Yarn, and Filament Resin

In addition to high transparency and good thermal properties, one of the main strengths of PET is its extremely easy and efficient, almost endless recycling possibilities.

PET was initially used in textile fiber and yarn applications. However, PET has been found to perform well in packaging and film applications as well. More recently, engineered resin applications have been developed for PET.

*Driven by flexibility, creativity and the desire to meet customer needs, Barnet provides experience, competence, reliability and service to thousands of customers all over the world.*
