

Cinte Techtextil China is the ideal trade fair for technical textile and nonwoven products in Asia. This year the fair welcomes **SKS High Performance Yarn (Kunshan) Co Ltd** from **China** to showcase their **high performance yarns & cords for automotive and industrial use.**

(Detailed product info featured on page 2.)

SKS High Performance Yarn (Kunshan) Co Ltd

SKS was founded in 1918 as a viscose spinner and has developed over the decades towards a dedicated converter for High Performance Yarns.

Today SKS is an international operating company that supplies customers throughout the world with high performance yarns and cords for MRG, Tire and Paper Felt applications. As an important link in the value chain for automotive and industrial manufacturers SKS services these markets by a global sales and marketing approach.

Single End Cord for Automotive and Industrial Belts

Today, belts in both the automotive and the industrial/agricultural sectors are being required to transmit ever higher forces. More and more aggregates are being driven by single belts, so to extend their lifetimes, belt components need to have high resistance to fatigue. In addition, in the automotive industry, belts are increasingly replacing metal chains as part of the drive to reduce CO2 emissions. SKS offers a range of high-tech cords that allow belt manufacturers to meet these new demands and develop their products accordingly.

Single End Yarn for Automotive and Industrial Hoses

The challenge for today's hose manufacturers is to meet the ever-increasing demands of industry and OEMs for higher working pressures, more flexible handling, excellent dynamic performance, greater durability, and safer, "greener" products. SKS meets these diverse demands with a wide range of high-tech yarns for hose reinforcement.

Single End Cord for Tires

High uniformity and clean, perfect processing are the key requirements that today's tire manufacturers have of Single End Cord (SEC). The use of SEC in specific production methods is gaining ground due to higher efficiency and flexibility of the manufacturing process. For many years, SKS has been a key supplier of SEC, offering a tailored portfolio of high-tech SEC.

Single End Yarn for Paper Felt

Paper Machine Clothing (PMC) calls for stable and uniform monofilament-based yarn constructions to fulfill the requirements for processing and fabric stability. SKS offers a variety of specially optimized monofilament-based constructions to meet these needs.
