### **Andritz (China) Ltd Wuxi Branch**

ANDRITZ Nonwoven is one of the world's leading suppliers of technologies for the nonwoven and textile finishing industry. Its key competences lie in technologies for air-through-bonding, wetlaid, spunbond, spunlace, needlepunch, converting and textile calendering. Long years of experience in the hands of the well-known companies Küsters, Perfojet, Asselin-Thibeau and Diatec form the foundation of the ANDRITZ Nonwoven technology. The technologies of these companies complement one another ideally in process solutions for a great variety of applications. By uniting forces in engineering and process development, ANDRITZ can provide unrivalled expertise to the benefits of their customers. Complete lines, rebuilds, upgrades and automation are part of the portfolio, as well as business with individual machines.

ANDRITZ Nonwoven is compelled to continuously seek innovative technologies that fulfill customer demands. ANDRITZ Nonwoven has manufacturing facilities and technical center worldwide that comply with international standards, thus providing high quality assurance and quality control practices. Running complete lines calls for in-depth nonwoven expertise and excellent service. ANDRITZ offers a full service portfolio and thus can ensure improved uptime, productivity, and product quality. This includes on-site support, specific training, line audits and troubleshooting, upgrades and modernizations, genuine spare parts, and service and roll repair centers in Europe, North America, and China.

## State-of-the-art equipment geared to fit the Asian nonwovens industry

One special focus is the promotion of our location in Wuxi and our aXcess range, which has been especially developed for medium capacities. ANDRITZ (China) Ltd. Wuxi Branch has an experienced platform for production and service specially geared to fit the Asian nonwovens industry. It designs and manufactures cutting-edge lines to complement the ANDRITZ aXcess product range, which includes complete lines and individual machines for air-through bonding, needlepunch and spunlace processes. With the aXcess range, ANDRITZ has developed a hybrid line concept combining European and Chinese machines which is the ideal combination to obtain the best added value from each component in the line and being very flexible for different business cases. The service organization has been set up and optimized to provide prompt delivery and excellent customer support. A team of technicians and process experts can be deployed quickly to customer sites requiring full-range assistance. The ANDRITZ facilities include a roll service center with state-of-the-art grinding equipment and a test stand for various kinds of rolls. In addition, our aXcess range offers also technologies for spunlaid and wetlaid processes manufactured in Europe. Rising production speeds and width, compact and reliable design, and affordable investment costs are what customers are always seeking for in a competitive market environment. In order to meet these requirements perfectly, we recently enhanced our nonwoven calender and dryer ranges.

Furthermore, the concept of the neXline wetlaid aXcess targets smaller and medium production volumes and has been devised for new and existing lines. The compact line provides the ideal entrance to the growing wetlaid market, with a variety of final applications and options. Easy and fast shipment due to the compact design, which fits perfectly into containers. An operator-friendly configuration and versatile design ensure efficient production at affordable investment costs.

## ANDRITZ innovation strategy for the market of China

The Chinese nonwoven market is on the rise in terms of capacity and excellent roll good quality, serving both local and international markets. Chinese nonwovens manufacturers are increasingly requiring higher capacities and top-class quality for nonwoven products serving local and export markets. China is still the biggest market in terms of capacity and has the highest market capacity growth rates, despite the decrease in that rate due to bankruptcy of small nonwovens companies driven by fierce local competition. The market consolidation is clearly visible and investments into new nonwoven capacity/ industrial lines are still growing.

Due to the current situation, ANDRITZ recognizes a rapid growth in the demand for various face masks and other medical protection wear. This market is growing rapidly in many parts of the world, especially in Asia. Responding to this demand with roll good production technologies, such as complete spunlace lines and spunbond finishing lines and calenders, ANDRITZ recently developed converting technology for face masks with a clear goal to offer to Asian producers very state-of-the-art nonwovens technologies available on the market and innovative solutions. ANDRITZ innovation strategy for new products is driven by the idea of providing its customers with solutions that will bring more added-value to their products. ANDRITZ cares about enabling its customers to stand out against their competitors, with better fabric quality and best cost of ownership, thus securing their long-term profitability.

*"As one of the world's leading nonwovens exhibitions, CINTe is an important milestone and event for ANDRITZ Nonwoven. It is the perfect place to connect with customers and suppliers from all around the globe, especially Asia. The CINTe show gives us the opportunity to present our latest technologies and innovations to a top-class audience of nonwoven roll good producers and converters, but also to the complete nonwoven supply chain."*

*As an exhibitor at CINTe since many years, we have experienced that this exhibition provides an excellent market overview and allows us to spot new trends within this steadily growing market. It is the place to be for the nonwoven industry. This is why we focus at CINTe exhibition on absolutely state-of-the-art nonwovens technologies for fabrics specially developed for the Asian market and suitable for durable and disposable end uses."*
