

Cinte Tectextil China is the ideal trade fair for technical textile and nonwoven products in Asia. This year the fair welcomes **Truetzschler Nonwovens Man-Made Fibers GmbH** from **Germany** to showcase their **complete solutions for carding/spunlacing, wet-laying/spunlacing and thermofusion lines**. Main focus at CTC20 will be on **the efficient making of top-quality wipes and pads as well as nonwoven fabrics for hygiene and technical applications**.

(Detailed product info featured on page 2.)

Truetzschler Nonwovens Man-Made Fibers GmbH

For more than 130 years, the Truetzschler Group stands for innovative installations, machinery and accessories for spinning preparation, the nonwovens and man-made fiber industry.

In the nonwovens machinery segment the product range includes fiber preparation equipment, cards and crosslappers, spunlacing machinery, ovens and foulards as well as dryers and winding equipment. We offer turnkey installations, cutting-edge technologies and comprehensive service.

Truetzschler has its own wire supplier on board. Truetzschler Card Clothing looks back on decades of experience. Superior wires and locally organized, first-class service brings the most out of your production line.

The road to success: superior web quality

In the nonwovens world, high-speed, high-productivity processes give a competitive edge. Machines by Truetzschler Nonwovens are designed to combine efficiency and quality. The focus is on web forming – the crucial step to determine end product quality.

Single or multi-layer webs and composites made from natural, man-made or other fibers – we have a solution for all requirements. Select from a broad range of designs, card configurations and crosslappers to bring the desired properties to your end product.

The true way: test before invest

In the Nonwovens Customer and Technology Center (NCTC) in Egelsbach, Germany, ideas become reality. Bring your own fibers and design your desired product – and put our machines through their paces. A team of experienced experts develops the optimum manufacturing process with you.

2 fully equipped, industrial-scale lines give the certainty that the chosen solution delivers in practice what it promises on paper.

Fit for future: sustainable nonwovens

Truetzschler Nonwovens' especially concentrates on solutions for making sustainable nonwovens from renewable resources such as cotton, natural fibers, viscose and wood pulp. These fibers are the basis for high-value, biodegradable, single-use end products such as wet and dry wipes, face masks, femcare and medical textiles.

Near to you: the brand-new TTMJ company

Due to Truetzschler Nonwovens' big success in China, a second Chinese company has been founded recently. TTMJ – Truetzschler Textile Machinery (Jiaxing) – will concentrate on serving Chinese nonwoven customers and the growing Chinese nonwovens industry. TTMJ is planned as both a manufacturing and service hub.
