Polyester filament base cloth 聚酯长丝胎基布

Tiandingfeng polyester filament base cloth employs “one-step polyester spunbond needle-punched base cloth production technique” with independent intellectual property rights. It is made of high-quality polyester chips subjected to the following processes: forming continuous fibers through melt spinning, lapping, needle-punching, binding, gum dipping, sizing and drying. Its multiple properties far outperform some traditional base cloth products.

天鼎丰聚酯长丝胎基布是采用其拥有自主知识产权的“一步法聚酯纺粘针刺胎基布生产工艺”，以优质聚酯切片为原料，经熔融纺丝形成连续长纤维，再经铺网、针刺固结、浸胶、定型烘干等工序制成，多项性能远超传统胎基布产品。

Polypropylene (PP) filament needle-punched geotextile 聚丙烯长丝针刺土工布

PP spunbond needle-punched geotextile is a type of important high-performance geosynthetics. The material plays an important role in hydraulic engineering, hazardous waste landfill, tailings pond, airport and high-speed train projects. It took 4 years to overcome the difficulties for Tiandingfeng to manage resolving the technical barrier of industrialization of high-tenacity, coarse denier PP spunbond needle-punched nonwoven geotextiles. From then on, Tiandingfeng has become the only domestic enterprise which masters the production technique of PP spunbond needle-punched geotextile. The successful operation of this project brings to an end to the history of long-term dependence on importing foreign PP spunbond needle-punched geotextile. Tiandingfeng Polypropylene Material Technology Co. Ltd. adopts advanced spinning equipment. Therefore its filament number can reach at least 11dtex, and the intensity at least 3.5g/d. Besides all these edges, its lapping is uniform without cloudiness. The company also adopts post-finishing equipment with a patented technology so that transverse and longitudinal strength of products are consistent with the elongation. It means the product properties are more uniform and stable.

聚丙烯纺粘针刺土工布是一种重要的高性能土工合成材料，该材料在水利、危废填埋场、尾矿库、机场、高铁等工程的建设有重要的作用。天鼎丰公司历时 4 年艰苦攻关，成功攻克了高强粗旦聚丙烯纺粘针刺土工布产业化技术难关，成为国内唯一一家掌握聚丙烯纺粘针刺土工布生产技术的企业。该项目的成功投产结束了我国长期依赖进口国外聚丙烯纺粘针刺土工布的历史。天鼎丰聚丙烯材料技术公司采用先进的喷丝设备，单丝纤度能够达到 11dtex 以上，强度可以达到 3.5g/d 以上，铺网均匀无云斑。采用专利技术的后整理设备，产品纵横向强力及延伸率一致，产品性能更加均一稳定。
