- Nonwoven manufacturer
- Machine manufacturer
- Chemical & textile chemical user
- Fibre producer / spinner / weaver
- End user / procurement

Visitors' Testimonial

“ I was attracted to the fair for **its strong reputation and comprehensive offerings**, to explore alternatives for our single-source materials. With **sustainable yarns increasingly important in Europe but limited there**, I find the Asian and Chinese markets effectively filling these gaps, providing the alternatives I seek.

I am pleasantly surprised by the nonwoven materials available onsite and I've **found almost everything I need here**. The **presence of many international companies** also added to the fair's appeal.

Mr Williams Peeters,
Sourcing Manager, Millien Textiles BV – Milliken Europe BV, Belgium

Visitors' Testimonial

“ — This is my first visit here, looking for **special materials** and **high-end technology**, particularly functional items for the automotive sector. The fair's internationality allowed me to **discover unique materials** and **techniques** from various places, including European countries like Germany, as well as Saudi Arabia, Hong Kong and around the world.

There are a lot of foreign visitors here as well. Spanning three halls, the fair is a sizable, **effective sourcing platform** – it's easy to meet people face-to-face and to see the products.

Mr Harald Bartisch,
CEO, Blue Brain Alpha Science Coaching/Consulting, Austria
